Mattress Height approx 23cm (9") 2 Sided mattress.

Exceptional Characteristics

Spring Unit: 5 Turn Bonnell System.

Each coil is electronically heat treated then the whole unit is baked to temper the carbon high tensile steel. to secure uniform strength, resistance and prolonged life of the spring unit.
The open structure of Bonnell provide best ventilation of the mattress. Heat and humidity are neutralized.

Bonnell design: Single 192 coils; 8 rows x 24 lines. 2.2mm wire (13.5g SWG / 11.25g AWG).
Double 312 coils; 13 rows x 24 lines. 2.2mm wire (13.5g SWG / 11.25g AWG).
Helical wire; 1.4mm (17.5g SWG / 15.5g AWG).
Border frame; 4.9mm (6g SWG / 4.5g AWG).
Spring unit height; 160mm

A 5 Turn spring is a more stable & longer lasting spring!

Fillings: Thermobonded felt insulation covers the spring unit, a long lasting, breathable, resistant cushioning. A minimum of **3000 grams per square meter** distributes body pressure over the Bonnell spring system and allows for body heat distribution and ease of movement. The aerated construction allows for a fresh cool dry environment to rest. Extra firm construction.

Thermobond Polyester A remarkable synthetic wool-like product that is high loft sculpture quilted into the outer layer providing strength, form, loft and comfort to the finish of the entire mattress. The softness and loft provides a soft feel and warmth to the mattress.

Upholstery: Jaquard An envelope of **168** gram per square meter of Quality Woven Textured Jaquard multi-quilted with the **330** grams per square meter of non wovan & Thermobonded polyester filling to give reassurance of a Durability & Comfort
